Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/764,076	Applicant(s) BAUER ET AL.	
	Examiner TERESA WOODS	Art Unit 4114	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
 - Group I, claim(s) 181-195, drawn to class 705/400 which describe a system where once the recorded characteristics are retrieved they're assigned level of risk is used to determine the cost of insurance.
 - Group II, claim(s) 196-199, drawn to class 705/7 which describe the analysis of vehicle mileage which is periodically collected from one processor, while a second processor assigns its level of risk to determine future cost of insurance. Based on the mileage of a vehicle that is collected at any time, the cost of insurance is then determined.
 - Group III, claim(s) 200, 223, 224, 225-239, drawn to class 707/100 which describe a risk management system comprising a network server, database, and interface module to generate a driver safety score, insurance premiums based on the safety scores and the user's vehicle operating habits that can be retrieved remotely.

Art Unit: 4114

- Group IV, claim(s) 201-205 and 215-222, drawn to class 717/171 which describe a system that monitors data transferred among a vehicle bus, wireless monitor, processor, memory storage, wireless transmitter and sensors that determine levels of risk and configured to retrieve new, communications software product releases.
- Group V, claim(s) 206-214, 248-260, drawn to class 705/4 which describe the analysis used in determining the level of risk involving the operation of a vehicle to either initially set or adjust a user's cost of insurance.
- Group VI, claim(s) 240-247, drawn to class 705/50 which describe a risk management system that uses a computer, a database, a interface module and a memory storage all to access encrypted data to determine the cost of insurance.

4. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Each group as claimed is properly classified into separate class/subclass showing the distinctions between the claim groups.

5. A telephone call was made to Jim Collins on 13 January 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 4114

7. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
